

Solar Shades by Shade Solutions

Raising outdoor shade products to a new level of excellence. The easy to operate shade is clutch driven. There are no visible cords or pulleys that will compromise the aesthetics of your home or business. The shades are fabricated using a rugged EXTERIOR vinyl coated polyester fabric that has been developed to withstand most inclement weather conditions. The material is both mildew and fade resistant and fire retardant. The UV Blockage is available in 95%, 90%, and 80% +3%. Shade factor varies depending on choice of color. Shades are easily cleaned with a mild soap and water solution.

Both the hanging brackets and the attractive bottom hem bar are painted with baked enamel.

Standard Colors: Desert Tan, Light Tan, Beige, Brown, Gray, White, Black, and Desert Sand

Dimensions and Seams: Desert Tan, Light Tan, White, and Desert Sand are available in 96" widths. If at least one dimension is EQUAL or less than these sizes the shade can be constructed with out a seam. All Seams will be horizontal and as close to the top of the shade as possible. ADD A CHARGE OF \$40.00 for each shade that needs to be seamed.

MEASURING OUTSIDE BRACKET: Add a minimum of 1 ½" per side to allow the overlap on opening. **INSIDE BRACKET:** Measure opening size. Factory will take a deduction that will allow a clearance of 5/8" on each side. BRACKETS are UNIVERSAL AND MAY BE USED FOR EITHER CEILING OR WALLMOUNTING.

SHIPPING: All shipments will be FOB Phoenix

CANCELATIONS and RETURNS: Due to the custom manufacturing of our product, orders may not be canceled after materials have been cut. **RETURNS:** Returns must be pre-approved and have RA number to be excepted at the factory.
